### TREES Note:

- All trees to be rootballed unless otherwise specifed Mulch: All specimen trees in soft landscape to have 75mm mu • depth of mulch in 500mm radius around tree base. Topsoil: To be spread in layers no greater than 150mm depth. Gently firm each layer before spreading the next. Do not comp topsoil. Preserve a friable texture of separate visible crumbs wherever possible.
- Subsoil: Grade to smooth and flowing contours to achieve specified finished levels of topsoil. Spread subsoil in layers of r more than 200mm thick and consolidate each layer with earthmoving plant to exclude large voids but prevent over-compaction. The resulting area must form free draining ground, free from hollows or depressions. If area becomes over-worked or compacted, loosen thoroughly with a 3 tine rip Root barrier: All trees within 6m of hard surfacing, services or •
- structure to have appropriate depth (1200mm adjacent to serv and 600mm adjacent to hard surfaces) of proprietary vertically ribbed root barrier located to protect relevant surface / service of structure.
- structure.
  Aeration/ Irrigation: All specimen trees to have appropriate proprietary aeration/ irrigation provision.
  Fencing to woodland planting blocks: 1400mm high timber pos wire with vermin mesh stockproof fence
  All trees to have underground guying support fixings to be suitable to ground conditions
